

FIXED, HINGED OR MAGNETIC SCREENS

TEL: 01254 386776

These screens have aluminium frames finished in white polyester coating for ease of cleaning. There are options of having the screens hinged, at the top or sides, magnetic fixings and mid cross bars for adding strength to longer lengths.

The frame options are the 1 rolled aluminium 19mm x 10mm frame or the extruded 30mm x 10mm frame. Mesh is available in Grey, Green Black, White, Sand or in stainless steel. The components slot together easily and the mesh is held in place by the rubber gasket. The screens are available ready made or as kits.

The hinges and turn buttons will add an additional 16mm each to the overall dimension.
